

MC FIX 1 MINUTE & 5 MINUTE WATER PLUGS

MC FIX Series Water Stop Plugs

A Total Solutions Approach

MC Fix ST - 60 Second Set

Cement based, sixty-second set time, grout/plug for water stop in manholes, pump stations, burst pipes, basements, tunnels, shafts and more.

Prepare void/leak by forty-five-degree shape and minimum 3cm deep to ensure proper adhesion to substrate.

Excellent for emergency water stoppage in many applications and situations.

Excellent for water, waste water and commercial and residential plumbing trades.

Mix MC Fix ST and water at 3:1 by volume, form plug or putty in hand with glove and hold in void until set hard. Keep dry and container sealed always.

MC Fix ST5 - 5 Minute Set

Cement based, five-minute set time, grout/plug for water stop in manholes, pump stations, burst pipes, basements, tunnels, shafts and more.

Prepare void/leak by forty-five-degree shape and minimum 3cm deep to ensure proper adhesion to substrate.

Excellent for emergency water stoppage in many applications and situations.

Excellent for water, waste water and commercial and residential plumbing trades.

Mix MC Fix ST and water at 3:1 by volume, form plug or putty in hand with glove and hold in void until set hard.

Keep dry and container sealed always.

Please see TDS/SDS and General Application Guide for more information.

Follow standard and acceptable industry practices for cleaning, surface preparation, product application and curing procedures for fit for purpose specification outcome.
