

NEW WinCan VX and its main advantages

WinCan VX lets you invest in the functionality you require today and then add capabilities as future needs arise. Value bundles make essential functionality affordable even for the smallest water authority or contractor with the assurance that down the road you can expand functionality. Growing organisations demand versatility and WinCan VX scales to meet all your future needs.

Cloud compatibility
Securely publish inspection data, images and video to the cloud using your own server or WinCan's. An authorised user can view up-to-the minute results on any platform using a common Web browser. No more versioning issues or missing codecs, WinCan Web brings data effortlessly to the cloud.

Modern user interface
WinCan VX has a new user interface which adapts to any screen size and the main screen is completely customisable.

Newest Video Technology
WinCan VX integrates with the newest video drivers and hardware available on the market.

GIS & Mapping
WinCan VX's full-featured GIS implementation makes it easier than ever to manage infrastructure data using GIS as the front end. Simply click and drag on a map to create entire WinCan projects with pre-populated section data.

WRc MSCCS
WinCan VX includes the new data collection standard MSCCS.

The image displays several key components of the WinCan VX software:

- Inspection Report / Inspection: 1**: A detailed form showing project details such as Date (21 Jun 2018), City (New York), and various inspection parameters.
- Data Table**: A table listing inspection sections with columns for Section, Material, Pipe, Diameter, and Length. For example, Section 1 is a 0.81m section of BCASP material with a 500mm diameter pipe.
- GIS Map**: A screenshot of the software's GIS interface showing a map with a red line indicating the inspection route.
- Product Box**: A 3D rendering of the WinCan VX software box, featuring the WinCan logo and the slogan "Always ahead".
